SAUMYADEEP CHAKRABORTY

Cloud Platform Engineer | AWS | Infrastructure Automation | Linux
Kolkata, India | sdeepchakraborty4@gmail.com | +91-7003327722
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Cloud Platform Engineer with 5+ years of experience designing, automating, and operating enterprise cloud infrastructure across AWS, OCI, Azure, and GCP. Proven experience supporting 200+ servers and 20+ AWS accounts through infrastructure as code, CI/CD, cross-account automation, cloud security, Linux administration, monitoring, and incident management. RHCSA-certified with a record of improving reliability, patching SLAs, audit readiness, and operational efficiency.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, Lambda, IAM, SSM, Backup, Secrets Manager, CloudWatch, VPC, SNS), OCI, Azure, GCP

Infrastructure as Code: Terraform, CloudFormation, environment provisioning, configuration management

Automation and Scripting: Python, Bash, shell scripting, AWS Lambda, event-driven automation

CI/CD and DevOps: GitLab CI, GitHub Actions, JFrog Artifactory, pipeline automation

Containers and Orchestration: Docker, Kubernetes, Rancher, container-based deployments

Monitoring and Operations: Datadog, CloudWatch, SNS alerting, incident management, performance optimization

Operating Systems: RHEL, Amazon Linux, Oracle Linux, Windows Server, Linux administration

Security and Governance: IAM, Secrets Manager, VPC networking, SOX compliance, cloud governance

PROFESSIONAL EXPERIENCE

Deloitte | Hybrid Cloud Engineer / Cloud Platform Engineer | Kolkata, India | 2019 - Present

- Architected and administered cloud infrastructure across 20+ AWS accounts managing 200+ production servers; served as a primary SME for cloud platform engineering and incident escalations.
- Designed cross-account AWS automation using Python-based Lambda functions with IAM role assumption, reducing manual operational overhead by more than 40%.
- Built zero-day Windows patch automation using AWS Systems Manager Run Command and Lambda event triggers, reducing patch deployment cycle time from approximately 6 hours to 3 hours.
- Implemented infrastructure as code pipelines using Terraform and CloudFormation across AWS, Azure, and OCI, standardizing provisioning and reducing configuration drift.
- Developed SOX-compliant AWS Backup reporting with cross-account aggregation into centralized monthly CSV reports, reducing manual audit effort by approximately 70%.
- Engineered monitoring and alerting with CloudWatch, SNS, and Datadog; implemented AWS Secrets Manager security controls with user-level audit tracking.
- Automated GitLab inactive-user lifecycle management and Artifactory usage reporting with Python and Bash, reducing license consumption by approximately 10% monthly.
- Managed Kubernetes and Rancher-based application deployments and maintained GitLab CI pipelines for automated Artifactory validation workflows.
- Performed Linux administration across RHEL, Amazon Linux, and Oracle Linux, including troubleshooting, performance tuning, user management, and security hardening.

SELECTED PROJECTS

Cross-Account AWS Backup Compliance Automation

- Automated backup validation and SOX-compliant reporting across 20+ AWS accounts using Python Lambda functions and cross-account IAM role assumption; reduced manual audit effort by approximately 70%.

Zero-Day Windows Patching Automation

- Designed KB-based Windows patch deployment using AWS Systems Manager Run Command and Lambda event triggers, cutting deployment time by 50%.

Cloud Governance and Platform Automation Suite

- Delivered Python and Bash automation for GitLab user lifecycle management, JFrog Artifactory reporting, AWS Secrets Manager access monitoring, and SNS alerting across 50+ repositories.

Music Control - macOS Menu-Bar and Notch Companion

- Built a native SwiftUI and AppKit application for Apple Music, Spotify, browser media, volume, mute, audio-output selection, battery status, and compact menu-bar/notch controls. GitHub project.

CERTIFICATIONS AND EDUCATION

RHCSA - Red Hat Certified System Administrator (2024)

Bachelor of Computer Applications (BCA) | 2017 - 2020
